Quiz . 20 Total Points

😊 Great job! Keep pushing for that perfect score! 🚀🌟

Your marks : 19 / 20

1. Which type of Power BI visualization is best for comparing values across categories?

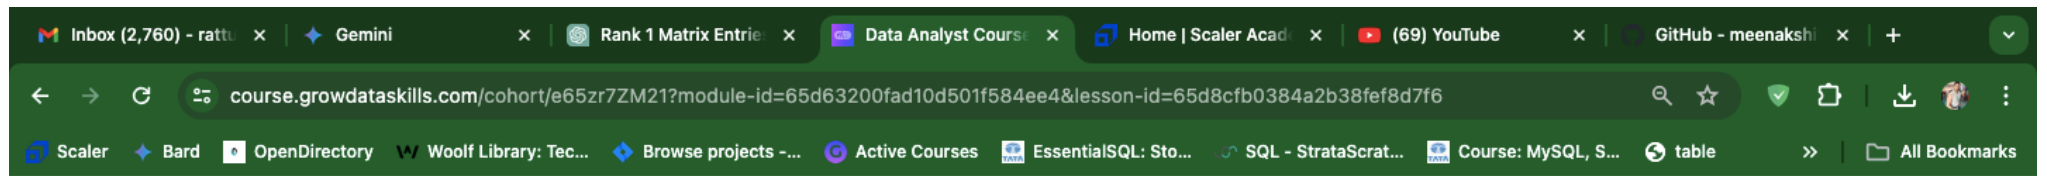

- ☐ Table
- ☐ Pie Chart
- ☒ Bar Chart
- ☐ Funnel Chart

✓ Correct!

2. Which Power BI visualization type is suitable for displaying the distribution of data and identifying outliers?

- ☐ Line Chart
- ☐ Scatter Chart
- ☒ Box and Whisker Plot
- ☐ Area Chart

✓ Correct!

3. In Power BI, what is a "slicer" used for in visualizations?

- ☐ To display summary statistics
- ☐ To create custom calculations
- ☒ To filter data
- ☐ To perform data modeling

✓ Correct!

4. What does the "drill-through" feature in Power BI allow you to do?

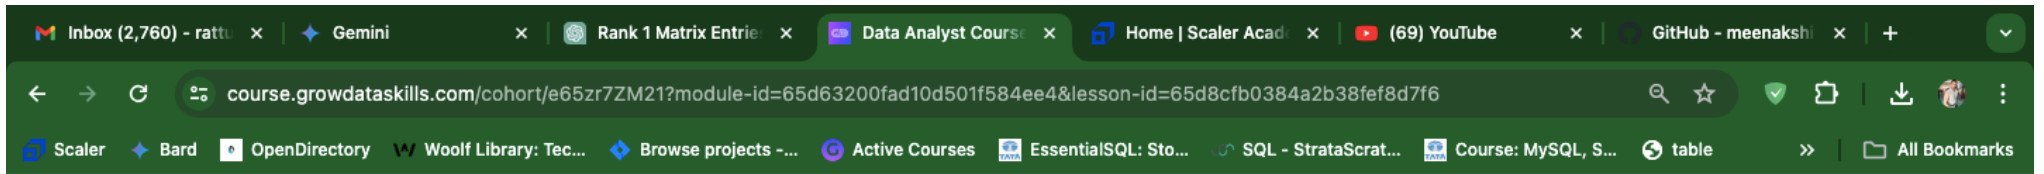

- ☐ Create custom visuals
- ☒ Navigate to related pages/data
- ☐ Export data to Excel
- ☐ Perform data transformation

✓ Correct!

5. Which visualization type is best for showing hierarchical data, like organizational structures?

- ☐ Matrix
- ☒ Tree Map

5. Which visualization type is best for showing hierarchical data, like organizational structures?

- ☐ Matrix
- ☒ Tree Map
- ☐ Card
- ☐ Gauge

✓ Correct!

6. When should you use Direct Query mode in Power BI?

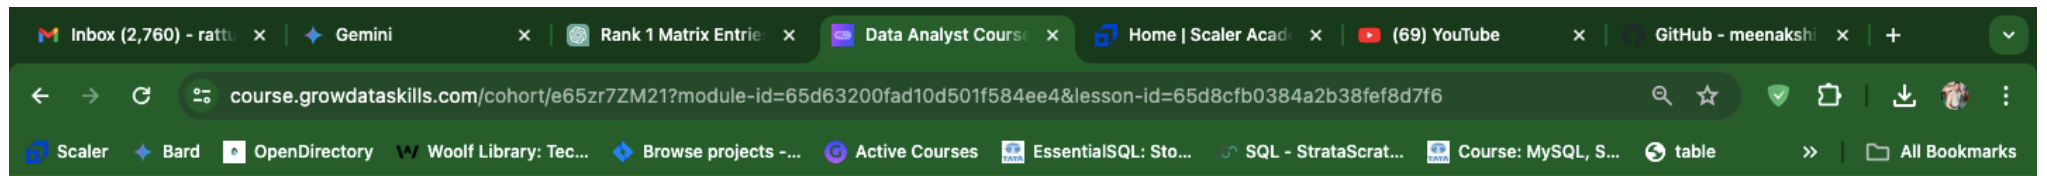

- ☐ When you need to perform complex data transformations
- ☐ When you want to load all data into memory
- ☒ When you need real-time data access
- ☐ When you want to create calculated columns

✓ Correct!

7. In Power BI, which mode allows you to create relationships between tables for complex data modeling?

- ☒ Import
- ☐ Direct Query

7. In Power BI, which mode allows you to create relationships between tables for complex data modeling?

- ☒ Import
- ☐ Direct Query
- ☐ Composite
- ☐ Live Connection

✓ Correct!

8. What is a limitation of Direct Query mode in Power BI?

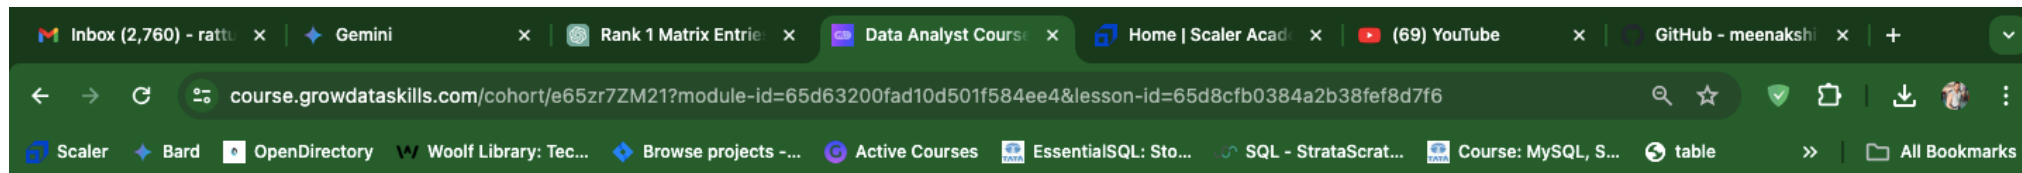

- ☐ It supports complex data transformations.
- ☐ It is highly suitable for disconnected scenarios.
- ☒ It may have performance issues with large datasets
- ☐ It enables in-memory data storage

✓ Correct!

9. In Direct Query mode, where is the data stored?

- ☐ In the Power BI model
- ☒ In the source system

9. In Direct Query mode, where is the data stored?

- ☐ In the Power BI model
- ☒ In the source system
- ☐ In the cloud
- ☐ In an on-premises server

✓ Correct!

10. Which mode is recommended for Power BI reports that require fast and interactive performance?

- ☒ Import
- ☐ Direct Query
- ☐ Dual
- ☐ Live Connection

✓ Correct!

11. What is the primary purpose of conditional formatting in Power BI?

- ☐ To create custom visuals

11. What is the primary purpose of conditional formatting in Power BI?

- ☐ To create custom visuals
- ☐ To add calculated columns
- ☒ To highlight specific data points based on rules
- ☐ To import data from external sources

✓ Correct!

12. Which visualization elements can be formatted using conditional formatting in Power BI?

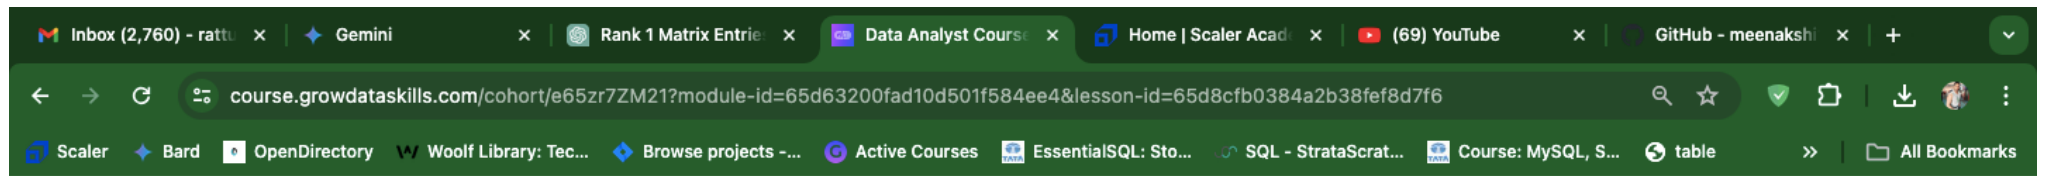

- ☐ Only text labels
- ☒ Text labels, background colors, and font colors
- ☐ Only background colors
- ☐ Only font colors

✓ Correct!

13. In Power BI, what do you call the rules used for conditional formatting?

- ☐ Filters
- ☐ Measures

13. In Power BI, what do you call the rules used for conditional formatting?

- ☐ Filters
- ☐ Measures
- ☒ Formatters
- ☐ Data bars

✓ Correct!

14. Which type of data can you use as the basis for conditional formatting in Power BI?

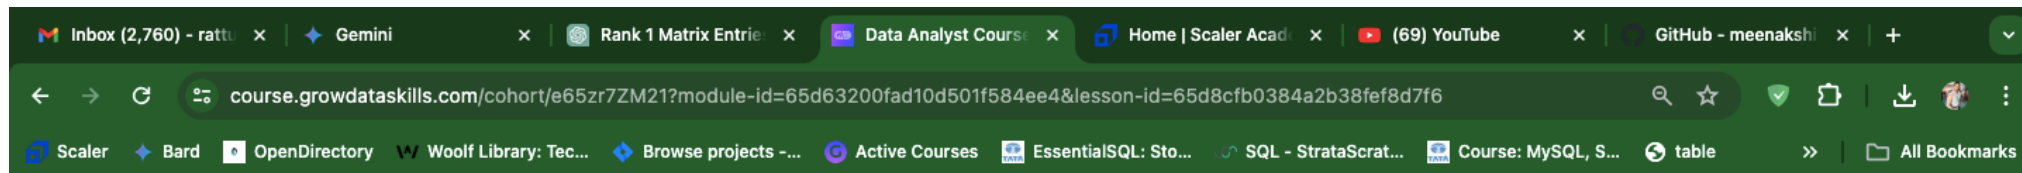

- ☐ Only numeric data
- ☐ Only text data
- ☒ Both numeric and text data
- ☐ Only dates

✓ Correct!

15. When using conditional formatting in Power BI, what is the significance of the "Color Scale" option?

- ☐ It changes the data type of the column.
- ☐ It assigns unique colors to each value in a column

15. When using conditional formatting in Power BI, what is the significance of the "Color Scale" option?

- ☐ It changes the data type of the column.
- ☐ It assigns unique colors to each value in a column
- ☒ It applies colors based on the data distribution
- ☐ It allows custom color selection for each value

✓ Correct!

16. Which step in Power Query allows you to combine multiple tables with a similar structure into a single table?

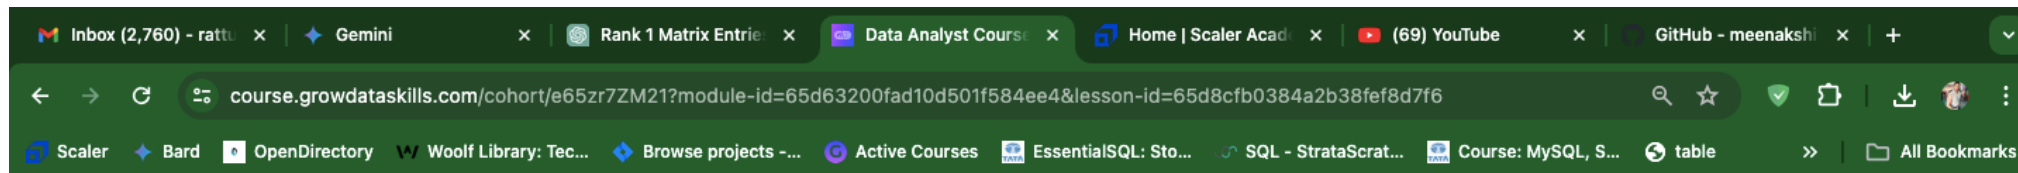

- ☐ Merge Queries
- ☒ Append Queries
- ☐ Pivot Columns
- ☐ Group By

✓ Correct!

17. In Power BI, what is the purpose of the "Merge Queries" step in Power Query?

- ☐ To create a new calculated column
- ☐ To transform data from one shape to another

17. In Power BI, what is the purpose of the "Merge Queries" step in Power Query?

- ☐ To create a new calculated column
- ☐ To transform data from one shape to another
- ☒ To combine data from multiple tables based on a common column
- ☐ To filter rows from a table

✓ Correct!

18. Which of the following statements is true regarding the "Inner Join" merge option in Power Query?

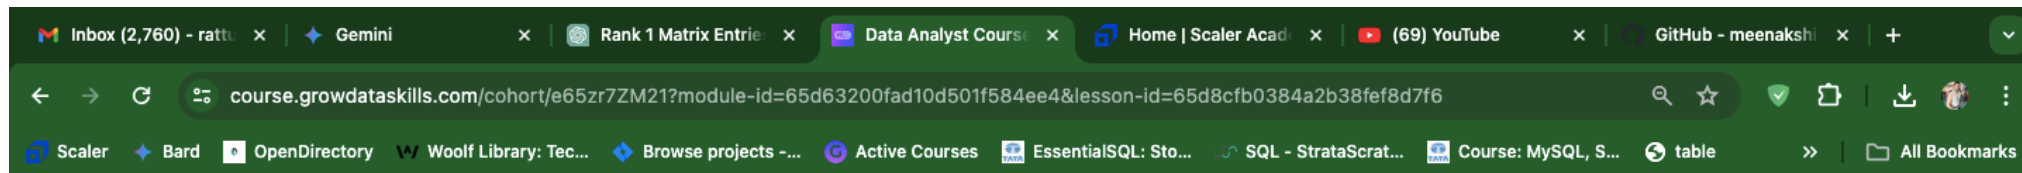

- ☒ It includes only matching rows from both tables
- ☐ It includes all rows from both tables
- ☐ It includes all rows from the first table and matching rows from the second table.
- ☐ It removes matching rows from both tables

✓ Correct!

19. In Power Query, which of the following actions can you perform after merging tables using the "Merge Queries" step?

- ☐ Filtering rows
- ☒ Creating calculated columns

19. In Power Query, which of the following actions can you perform after merging tables using the "Merge Queries" step?

- ☐ Filtering rows
- ☒ Creating calculated columns
- ☐ Unpivoting columns
- ☐ Aggregating data

✗ **Incorrect!**
Filtering rows is the correct answer

20. When should you use the "Append Queries" step in Power Query?

- ☐ When you need to create a relationship between tables
- ☒ When you want to combine tables with different structures
- ☐ When you need to create calculated columns
- ☐ When you want to pivot columns

✓ **Correct!**
