Quiz . 20 Total Points

😊 Great job! Keep pushing for that perfect score! 🚀🌟

Your marks : 18 / 20

1. What does DAX stand for in Power BI?

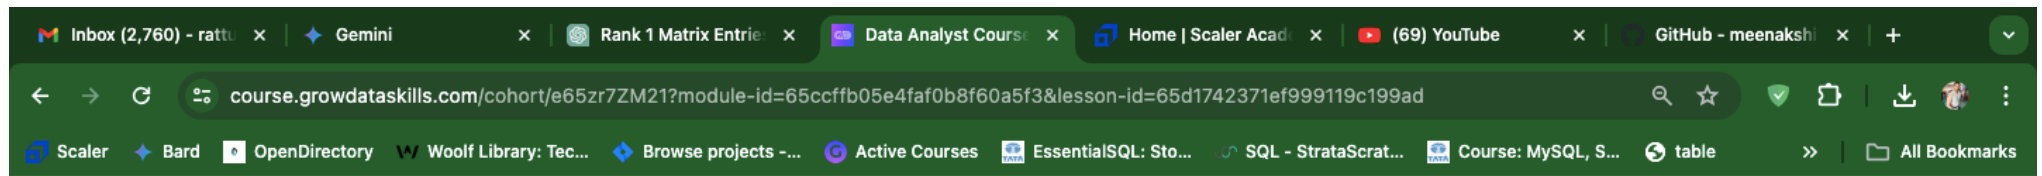

- ☐ Data Analysis Extremes
- ☒ Data Analysis Expressions
- ☐ Data Access Exchange
- ☐ Data Aggregation Xtreme

✓ Correct!

2. What is a calculated column in Power BI?

- ☐ A visual representation of data
- ☒ A column added to a table calculated row by row
- ☐ A calculated measure that summarizes data
- ☐ A filter applied to a visual

✓ Correct!

3. Which DAX function is used to calculate the sum of values in a column?

- ☐ SUMX
- ☐ COUNT
- ☐ TOTALSUM
- ☒ SUM

✓ Correct!

4. What is the primary purpose of the AVERAGE function in DAX?

- ☐ Calculate the median of a column
- ☒ Calculate the average of a column
- ☐ Calculate the standard deviation of a column
- ☐ Calculate the maximum value of a column

✓ Correct!

5. In DAX, what does the COUNTROWS function do?

- ☐ Counts the number of unique values in a column
- ☒ Counts the number of rows in a table or table expression

5. In DAX, what does the COUNTROWS function do?

- ☐ Counts the number of unique values in a column
- ☒ Counts the number of rows in a table or table expression
- ☐ Counts the number of blank values in a column
- ☐ Counts the number of distinct values in a column

✓ Correct!

6. What does the "drill down" feature in Power BI allow you to do?

- ☐ Create complex calculations
- ☒ Zoom in to see more detailed data
- ☐ Export data to Excel
- ☐ Apply filters to visuals

✓ Correct!

7. Which visual type in Power BI is commonly used for drill-down operations?

- ☐ Pie chart
- ☒ Bar chart

7. Which visual type in Power BI is commonly used for drill-down operations?

- ☐ Pie chart
- ☒ Bar chart
- ☐ Card
- ☐ Map

✓ Correct!

8. In a Power BI report, how can you typically initiate a drill-down operation?

- ☐ Right-clicking on a visual
- ☒ Double-clicking on a visual
- ☐ Pressing the Escape key
- ☐ Clicking on the Power BI logo

✗ Incorrect!

Right-clicking on a visual is the correct answer

9. When drilling down in Power BI, what happens to the level of detail in the visual?

- ☐ It remains the same

9. When drilling down in Power BI, what happens to the level of detail in the visual?

- ☐ It remains the same
- ☐ It decreases
- ☒ It increases
- ☐ It resets to the default level

✓ Correct!

10. What is the purpose of creating hierarchy levels in Power BI visuals?

- ☐ To group visuals together
- ☐ To create custom visuals
- ☒ To enable drill-down functionality
- ☐ To apply conditional formatting

✓ Correct!

11. What is the primary function of the DAX function MAX?

- ☒ Calculate the maximum value in a column
- ☐ Calculate the average of a column

11. What is the primary function of the DAX function MAX?

- ☒ Calculate the maximum value in a column
- ☐ Calculate the average of a column
- ☐ Calculate the sum of a column
- ☐ Calculate the total number of rows in a table

✓ Correct!

12. In DAX, what does the COUNTROWS function return if used on an empty table or filtered table?

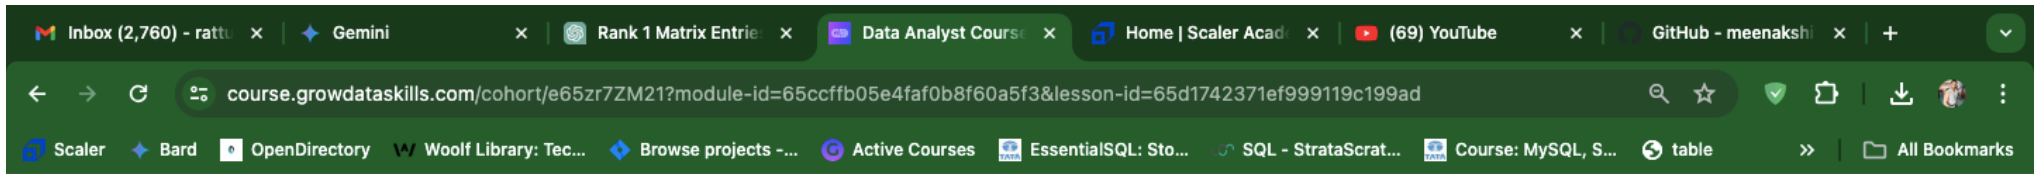

- ☒ 0
- ☐ 1
- ☐ Blank
- ☐ Error

✓ Correct!

13. Which DAX function is used to calculate the difference between two dates or times?

- ☒ DATEDIFF
- ☐ DATEADD

13. Which DAX function is used to calculate the difference between two dates or times?

- ☒ DATEDIFF
- ☐ DATEADD
- ☐ DAY
- ☐ COUNTDAYS

✓ Correct!

14. In Power BI, what is the purpose of creating calculated tables using DAX?

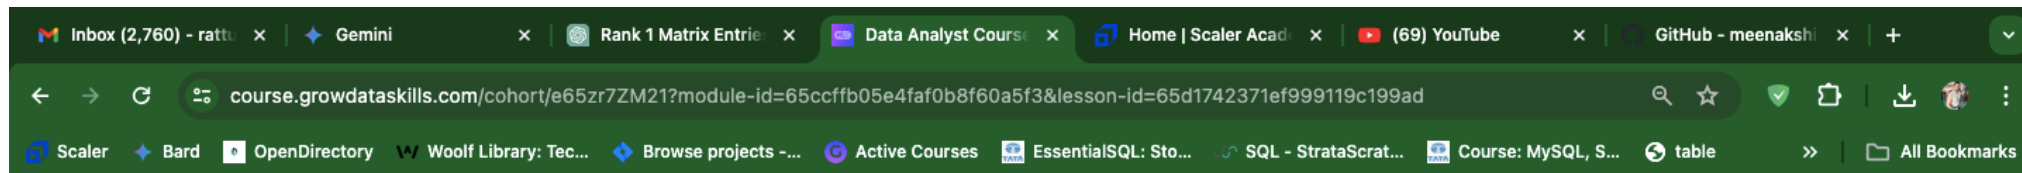

- ☐ To create tables that are imported from external sources
- ☒ To create tables with calculated values based on existing tables
- ☐ To create tables that can be directly queried from a database
- ☐ To create tables that cannot be used in visuals

✓ Correct!

15. Which DAX function can be used to calculate the running total of a measure in a table?

- ☐ RUNNINGTOTAL
- ☐ SUMX

15. Which DAX function can be used to calculate the running total of a measure in a table?

- ☐ RUNNINGTOTAL
- ☐ SUMX
- ☐ TOTALYTD
- ☒ CUMULATESUM

✓ Correct!

16. In a Power BI visual, what happens when you click on a data point to drill down?

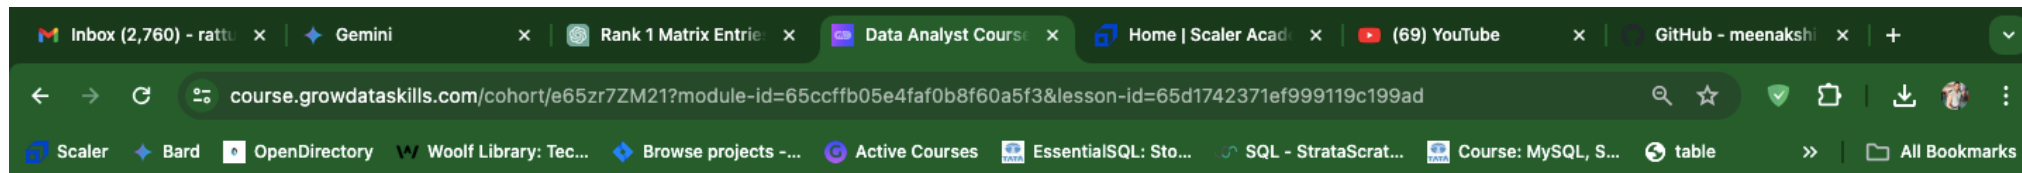

- ☐ The data point is removed from the visual.
- ☒ The visual expands to show more data related to the clicked point.
- ☐ A new visual is created.
- ☐ The visual becomes read-only.

✓ Correct!

17. Which type of visual allows you to drill down by default without any additional configuration?

- ☒ Table
- ☐ Line chart

17. Which type of visual allows you to drill down by default without any additional configuration?

- ☒ Table
- ☐ Line chart
- ☐ Donut chart
- ☐ Scatter plot

✔ Correct!

18. When drilling down in Power BI, can you view details at multiple levels of granularity?

- ☒ Yes, but only if you use custom visuals
- ☐ No, drill-down is limited to one level of detail.
- ☐ Yes, you can drill down to multiple levels.
- ☐ Only if you have a premium Power BI license

✘ Incorrect!

Yes, you can drill down to multiple levels. is the correct answer

19. Which DAX function is used to calculate the number of distinct values in a column?

- ☒ DISTINCTCOUNT

☐ COUNTA

19. Which DAX function is used to calculate the number of distinct values in a column?

- ☒ DISTINCTCOUNT
- ☐ COUNTA
- ☐ SUM
- ☐ MAX

✓ Correct!

20. What does the DAX function AVERAGE do?

- ☐ Calculate the average of a column.
- ☒ Calculate the average of non-blank values in a column.
- ☐ Calculate the sum of non-blank values in a column
- ☐ Calculate the maximum value in a column

✓ Correct!

Submit
