Quiz . 20 Total Points

😊 Great job! Keep pushing for that perfect score! 🚀🌟

Your marks : 19 / 20

1. What is Power BI primarily used for?

- ☒ Data visualization
- ☐ Data storage
- ☐ Data transformation
- ☐ Data mining

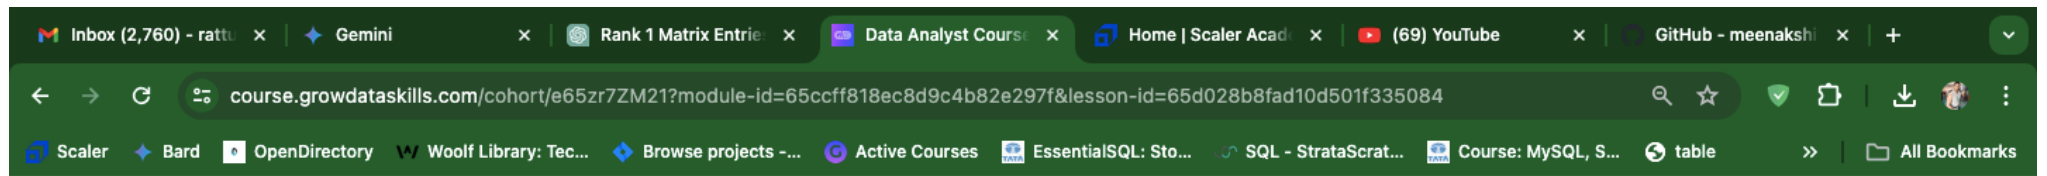

✓ Correct!

2. Which component of Power BI allows you to create interactive reports and dashboards?

- ☐ Power Query
- ☐ Power Pivot
- ☒ Power View
- ☐ Power Visuals

✗ Incorrect!

Power Visuals is the correct answer

3. Which file format can Power BI Desktop directly import data from?

- ☒ CSV
- ☐ MP4
- ☐ EXE
- ☐ DOCX

✓ Correct!

4. What is the purpose of Power Query in Power BI?

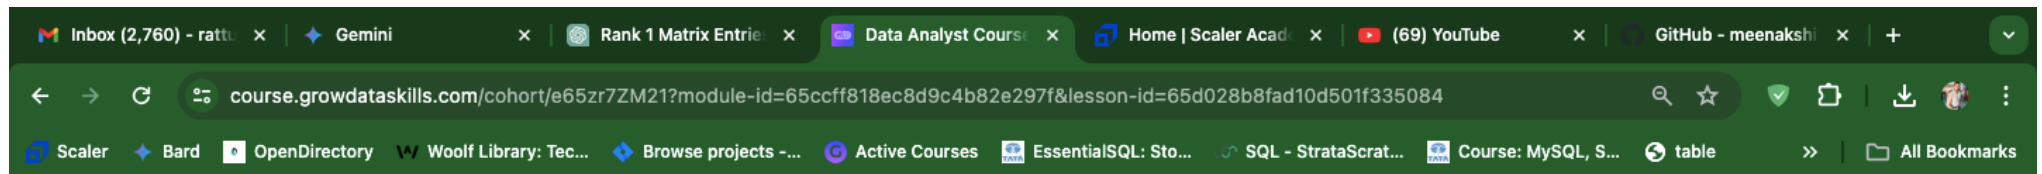

- ☒ Data transformation
- ☐ Data visualization
- ☐ Data modeling
- ☐ Data security

✓ Correct!

5. What is the main function of Power Query in data transformation?

- ☐ Creating visualizations
- ☐ Extracting data from Power BI

5. What is the main function of Power Query in data transformation?

- ☐ Creating visualizations
- ☐ Extracting data from Power BI
- ☒ Cleaning, transforming, and shaping data
- ☐ Managing relationships between tables

✓ Correct!

6. Which of the following operations can be performed in Power Query for data transformation?

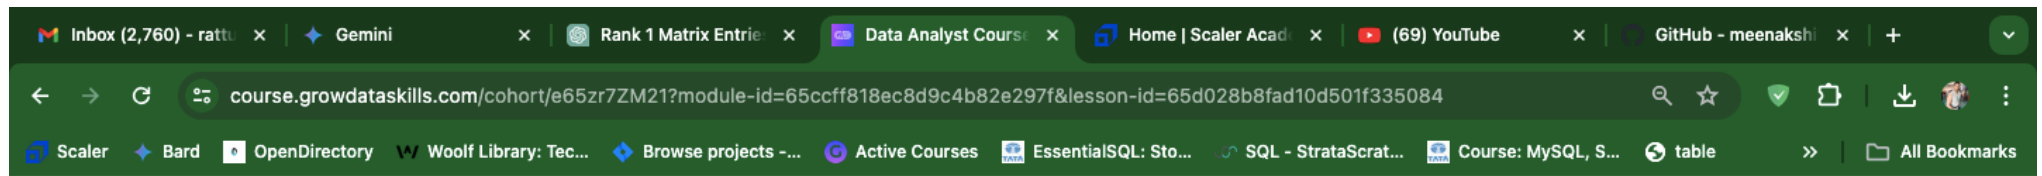

- ☐ Adding slicers
- ☐ Calculating measures
- ☒ Joining tables
- ☐ Creating visuals

✓ Correct!

7. In Power Query, what is the process of removing unwanted rows from a table called?

- ☒ Filtering
- ☐ Pivoting

7. In Power Query, what is the process of removing unwanted rows from a table called?

☒ Filtering

☐ Pivoting

☐ Grouping

☐ Slicing

✓ Correct!

8. Which language is used for advanced data transformations in Power Query?

☐ SQL

☐ DAX

☒ M

☐ VBA

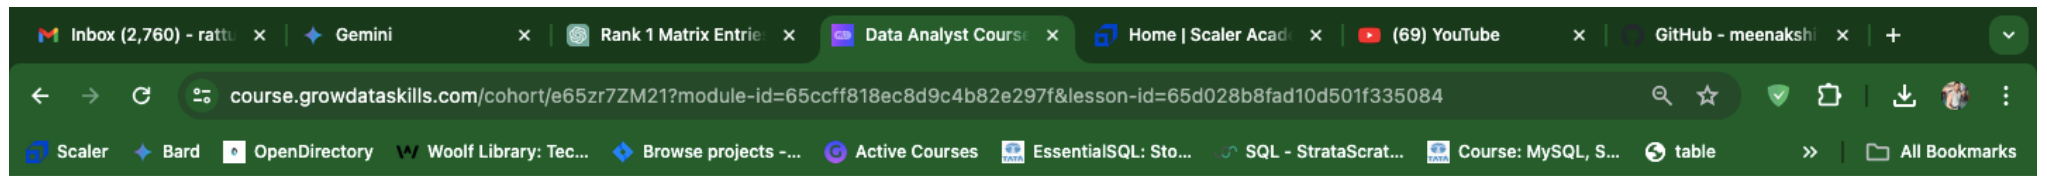

✓ Correct!

9. What does the "Replace Values" transformation in Power Query allow you to do?

☐ Modify column data types

☒ Replace specific values in a column with new values

9. What does the "Replace Values" transformation in Power Query allow you to do?

- ☐ Modify column data types
- ☒ Replace specific values in a column with new values
- ☐ Merge two tables
- ☐ Create calculated columns

✓ Correct!

10. In Power BI, what is a relationship?

- ☐ A data visualization
- ☒ A connection between two tables based on a common field
- ☐ A calculated measure
- ☐ A filter condition

✓ Correct!

11. Which type of relationship connects tables where one table's records are related to multiple records in another table, and vice versa?

- ☐ One-to-One

11. Which type of relationship connects tables where one table's records are related to multiple records in another table, and vice versa?

- ☐ One-to-One
- ☐ One-to-Many
- ☐ Many-to-One
- ☒ Many-to-Many

✓ Correct!

12. What is a "bi-directional" filter in Power BI used for?

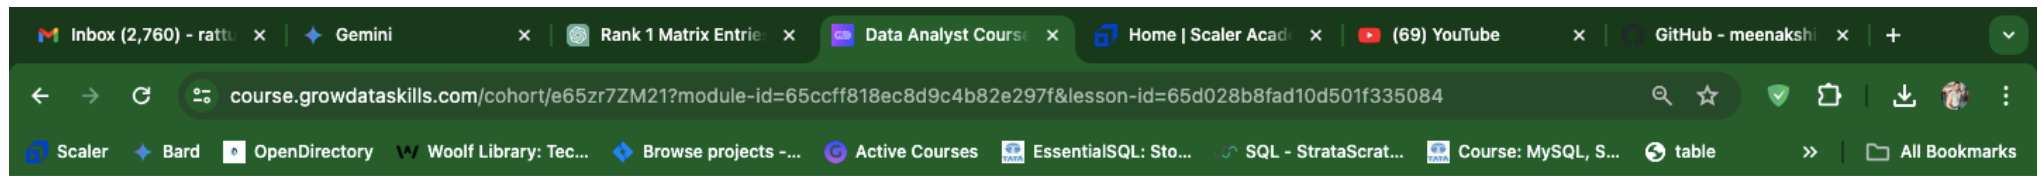

- ☒ It allows data to flow in both directions through a relationship
- ☐ It restricts data flow in both directions through a relationship.
- ☐ It creates a relationship between two tables
- ☐ It is not a valid concept in Power BI

✓ Correct!

13. What is the purpose of using "cross-filter direction" in relationships in Power BI?

- ☒ It determines the direction in which data filters are applied in visualizations.
- ☐ It specifies the type of visualizations that can be created

13. What is the purpose of using "cross-filter direction" in relationships in Power BI?

- ☒ It determines the direction in which data filters are applied in visualizations.
- ☐ It specifies the type of visualizations that can be created.
- ☐ It controls the color scheme of visuals.
- ☐ It defines the sorting order of data.

✔ **Correct!**

14. Which type of visual in Power BI is used to represent data as bars of varying lengths or heights?

- ☐ Pie chart
- ☐ Line chart
- ☒ Bar chart
- ☐ Scatter plot

✔ **Correct!**

15. Which Power BI visual is suitable for displaying data as a part-to-whole relationship, often represented as a circular chart?

- ☐ Bar chart
- ☒ Pie chart

15. Which Power BI visual is suitable for displaying data as a part-to-whole relationship, often represented as a circular chart?

- ☐ Bar chart
- ☒ Pie chart
- ☐ Scatter plot
- ☐ Table

✓ Correct!

16. What is a slicer in Power BI used for?

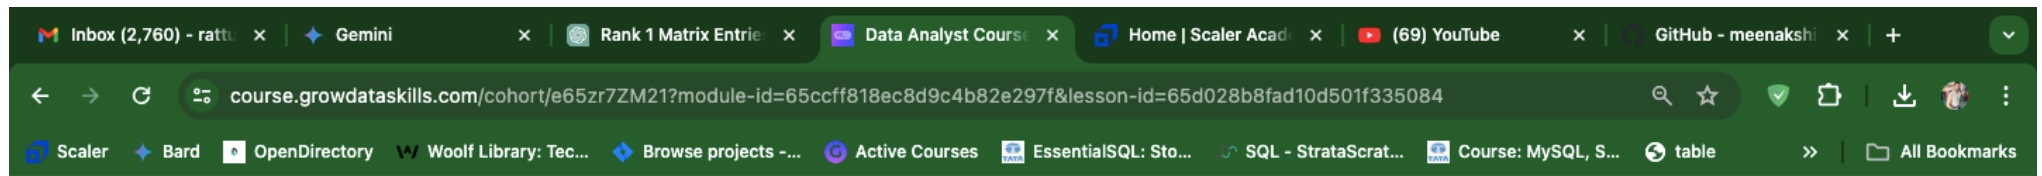

- ☐ To create calculated columns
- ☒ To filter data in a report
- ☐ To create relationships between tables
- ☐ To design custom visuals

✓ Correct!

17. Which type of slicer in Power BI allows users to select multiple items at once?

- ☐ Single-select slicer
- ☒ Multi-select slicer

17. Which type of slicer in Power BI allows users to select multiple items at once?

- ☐ Single-select slicer
- ☒ Multi-select slicer
- ☐ Hierarchical slicer
- ☐ Date slicer

✓ Correct!

18. How can you control the appearance of slicers in Power BI, such as adjusting their size or style?

- ☐ By using DAX expressions
- ☐ By modifying the underlying data model
- ☒ By customizing the slicer's formatting options
- ☐ By using custom visuals

✓ Correct!

19. Which of the following is a cloud-based service for sharing Power BI reports and dashboards?

- ☐ Power BI Desktop
- ☐ Power BI Mobile

19. Which of the following is a cloud-based service for sharing Power BI reports and dashboards?

- ☐ Power BI Desktop
- ☐ Power BI Mobile
- ☒ Power BI Service
- ☐ Power BI Gateway

✓ Correct!

20. Which operation in Power Query allows you to transpose rows and columns in a table?

- ☒ Pivot
- ☐ Unpivot
- ☐ Group By
- ☐ Merge

✓ Correct!

Submit
